CT Graphics

PRESENTATION SOFTWARE DESIGN

Business Presentations - $50/hr.

Often, we are called upon to make a presentation of some sort. Sometimes it's in a business setting, sometimes it's for school, and sometimes it's something that runs on its own for people to watch. Whatever the reason, Microsoft's PowerPoint is pretty much the industry-standard presentation software. Yet, many people have no idea of the full capabilities of PowerPoint.

That's where CT Graphics comes in. We can help you by designing a presentation that will knock people's socks off every time. And after people put their socks back on, they'll realize that your presentation was greatly enhanced by the visuals, rather than the opposite, which happens way too often. The next time you need to give a presentation and want to give it a little creative zing, be sure to remember CT Graphics.

Game Presentations - $50/hr.

Gamification is becoming a big deal in the business world, and is being followed closely in the education world. People learn better, get along with each other better, and become generally more productive when they play games. Sometimes games are used to introduce a topic to an audience, sometimes to relate to a subject which will be discussed in an upcoming meeting, sometimes they can be team-building activities, and sometimes they can just be done for fun!

CT Graphics has years of experience developing PowerPoint-based games to be used in large or small groups. We have many already pre-made games which can be used as-is or customized, and we can also make-to-order. Let us save you some time and be creative for you! Be sure to contact us the next time you need to lead a meeting, because we'd love to play games with you!
